REPORT OF ANALYSIS

One liter bottle of "Durasoil" was received on 12 December 2008. The liquid in the bottle was analyzed using Fourier-transform infrared spectroscopy (FT-IR). The resulting spectrum shows an aliphatic petroleum hydrocarbon with no evidence for the presence of esters or carboxylic acids.

The sample was evaporated to dryness in an oven at 90 °C. The weight loss after 72 hours was 1.9% (w/w), indicating very little volatile content.

The liquid was also analyzed for hydrocarbon distribution using gas chromatography (GC). The sample shows a normal hydrocarbon distribution ranging from C19 – C33 with a maximum at C25.

This sample shows no evidence for esters, fats or synthetic isoalkanes. The spectrum and chromatograms are enclosed for your reference.

Neil E. Spingarn, Ph.D.
President

CUSTOMER NO.: 21254
 UNIT NO.: DURASOIL
 DESCRIPTION: NEW DURASOIL SYNTHETIC ORGANIC DUST CONTROL AGENT
